1

Fabric

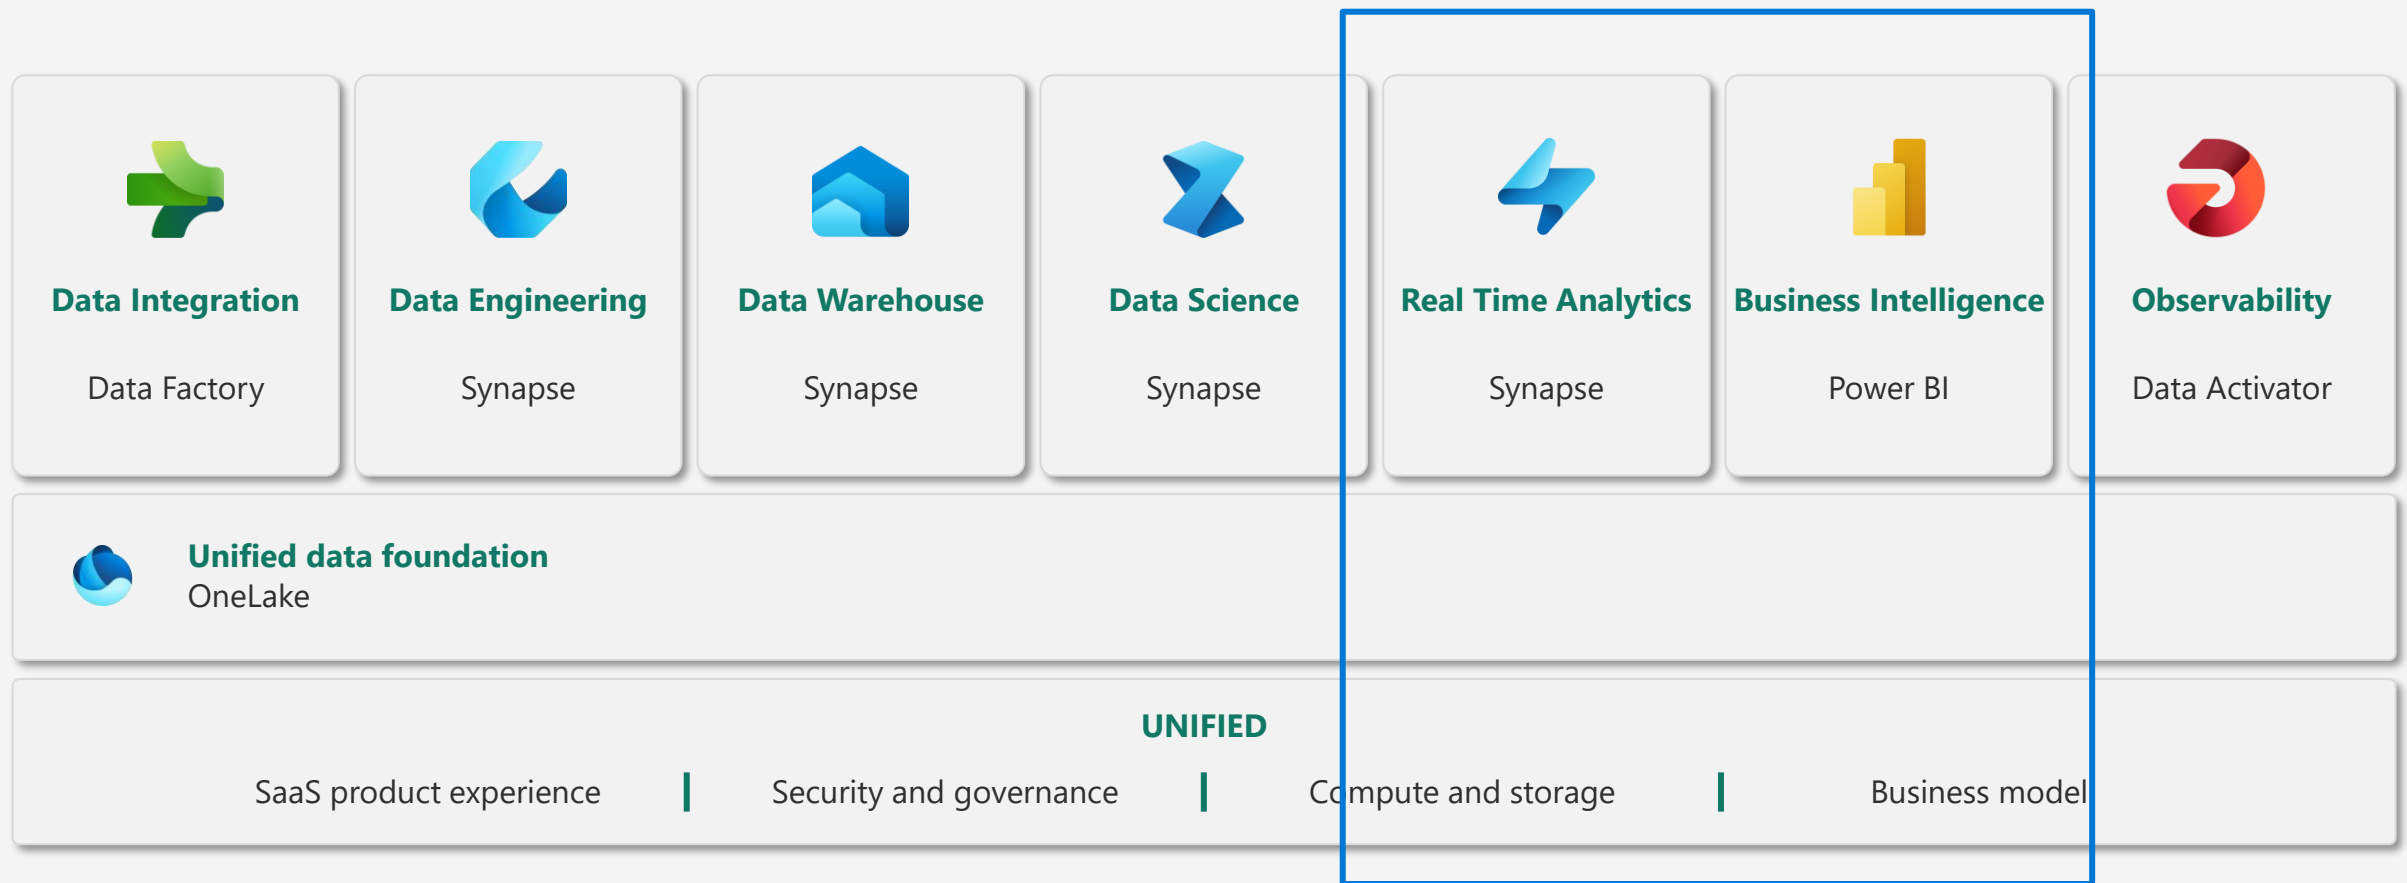

Introducing Microsoft Fabric

Microsoft Fabric enables you to manage your data in one place with a suite of analytics experiences that work together seamlessly, including:

- Data Factory
- Synapse Data Engineering
- Synapse Data Warehouse
- Synapse Data Science
- Synapse Real-Time Analytics
- Power BI
- Data Activator

Microsoft Fabric does it all—in a unified solution

An end-to-end analytics platform that brings together all the data and analytics tools that organizations need to go from the data lake to the business user

2

Real-Time Analytics

What is & Why Real-time Analytics?

Time Value of Data

- Snappy, responsive applications
- Faster decision-making
- Automated Intelligence
- Time-sensitive interventions

"The discipline that applies logic and mathematics to data to provide insights for making better decisions quickly."
Gartner

Real-time analytics use cases across industries

Transitioning to Real-time analytics in MF

(from Kusto / Azure Data Explorer)

BEFORE FABRIC

In Power BI - Streaming Datasets

- Very (very) Limited

With Azure

- Data Explorer (ADX):
 - PaaS
 - Costly and complex to provision

WITH FABRIC

Real-Time Analytics

- The power of Azure Data Explorer
- SaaS simplified platform
- Seamless integration with OneLake (and all the other fabric experiences)

Real-time analytics in Microsoft Fabric

Components:

Event Stream

KQL Database

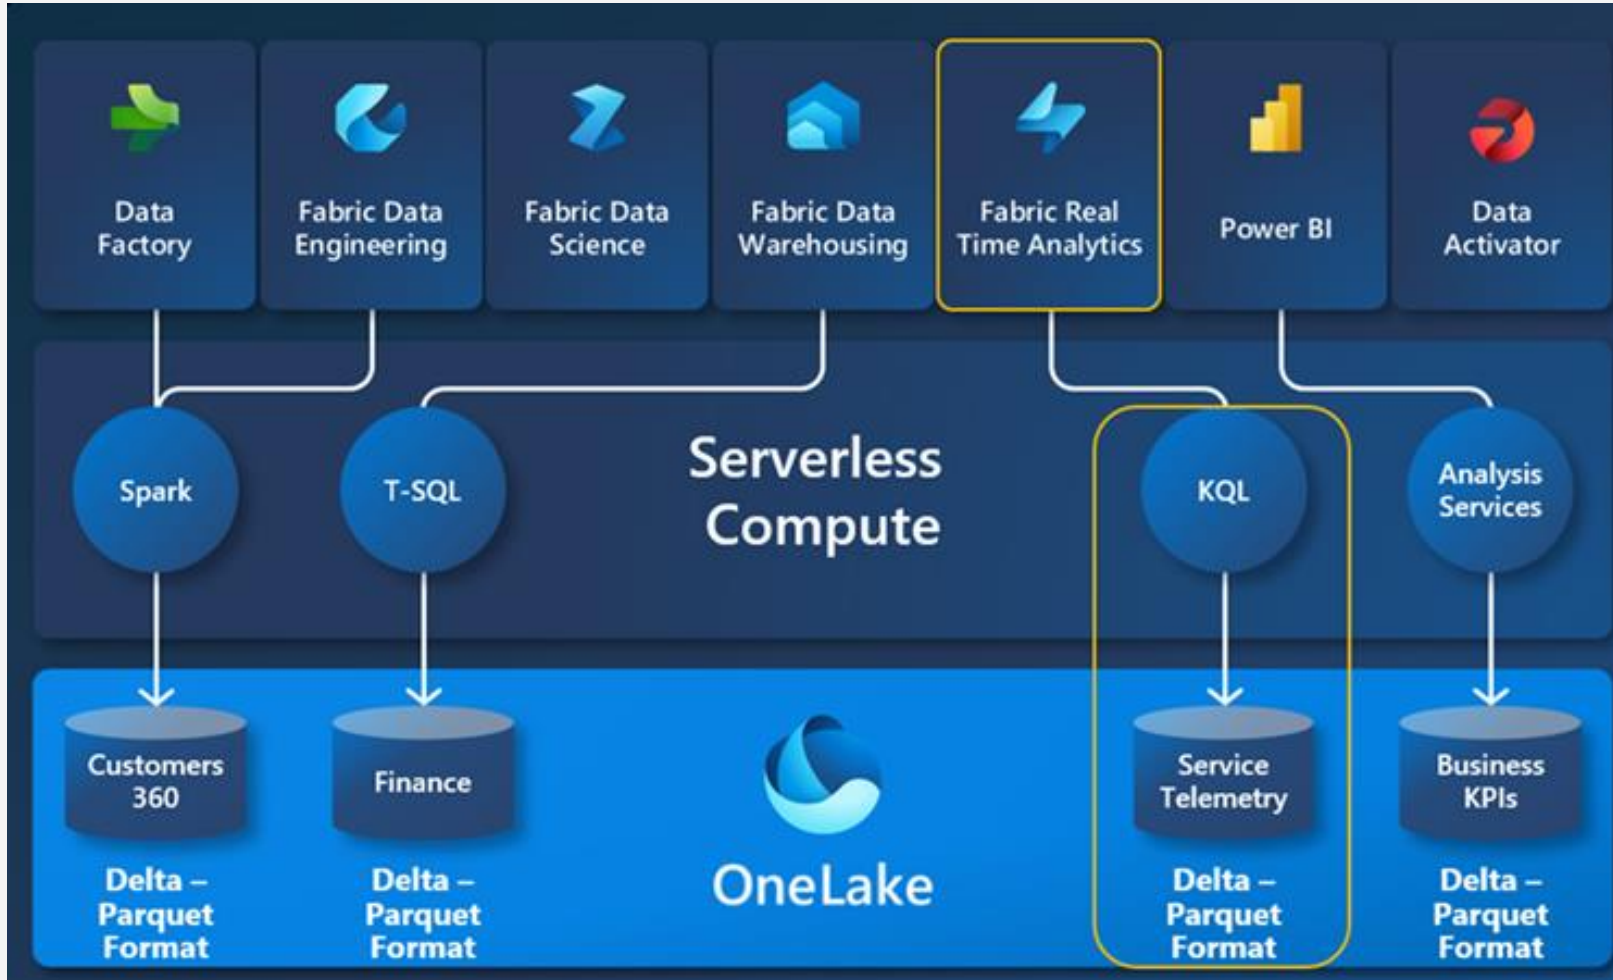

KQL Queryset

Eventhouse
(Preview)

Microsoft Fabric does it all—in a unified solution

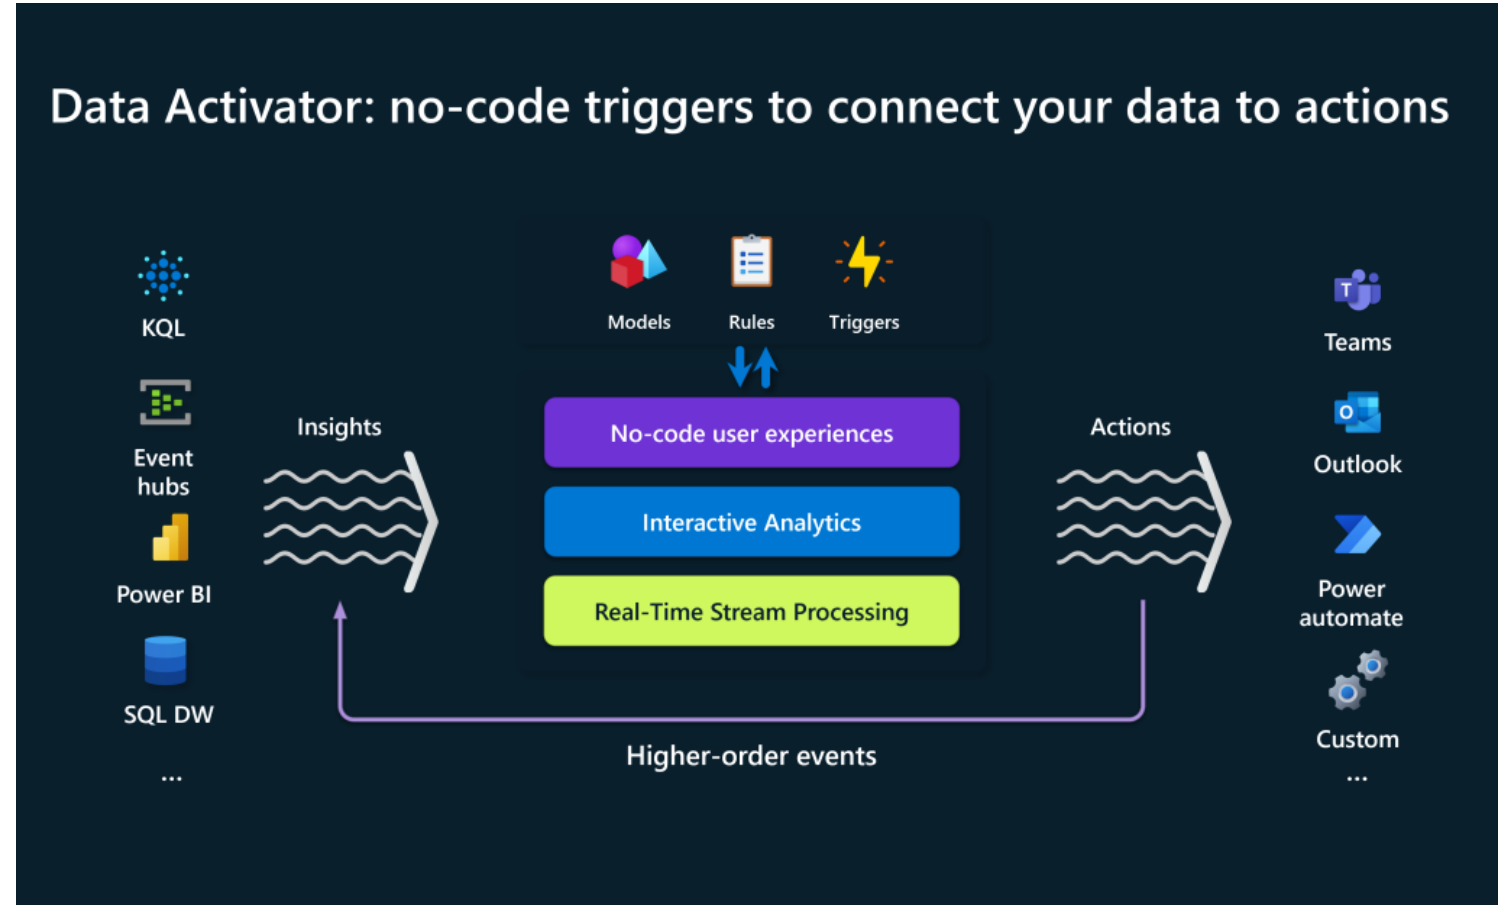

Dedicated query language (KQL) and Engine (KQL Database)

Microsoft Fabric Data Activator

A new way to drive actions from your data

How it works:

1. Connect to your data
2. Detect actionable conditions
3. Trigger Actions

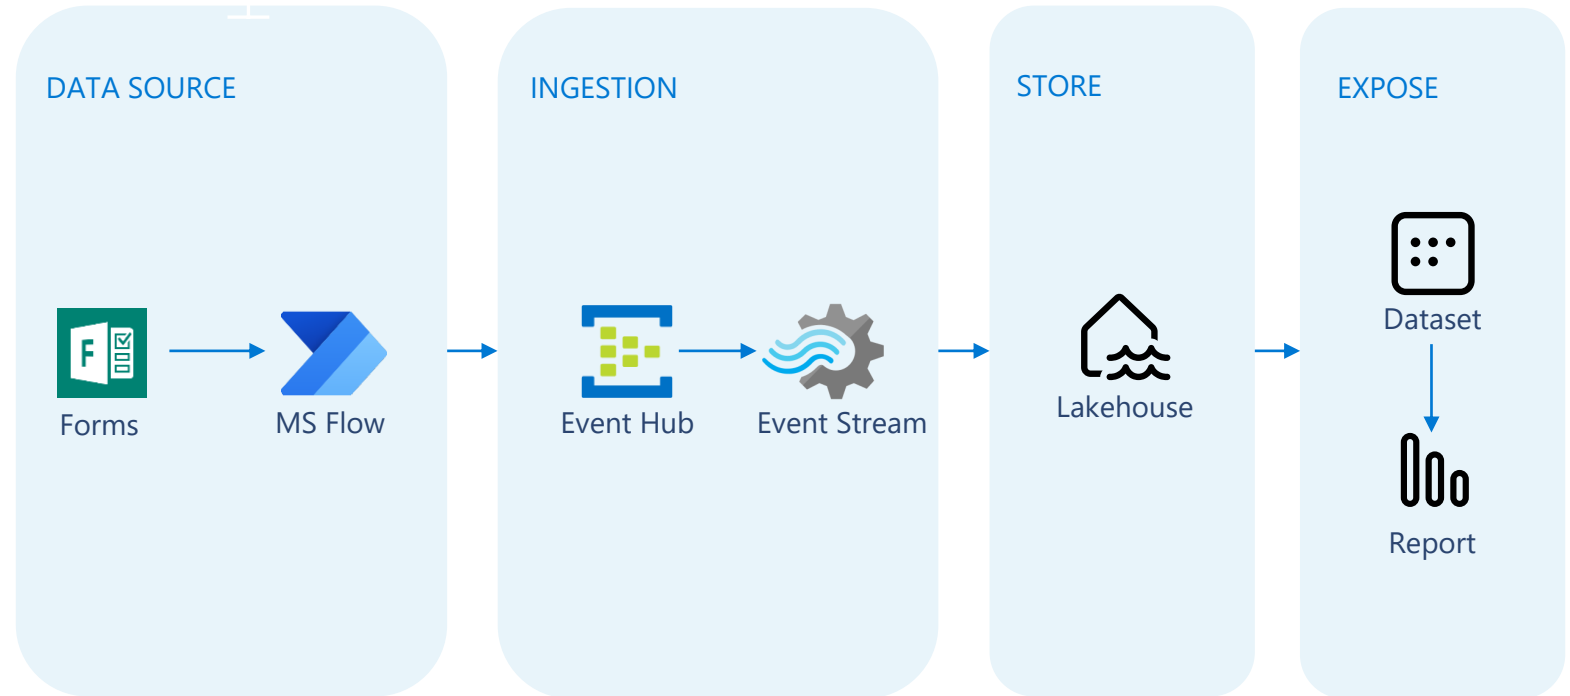

3

Demo Time

Architecture

4

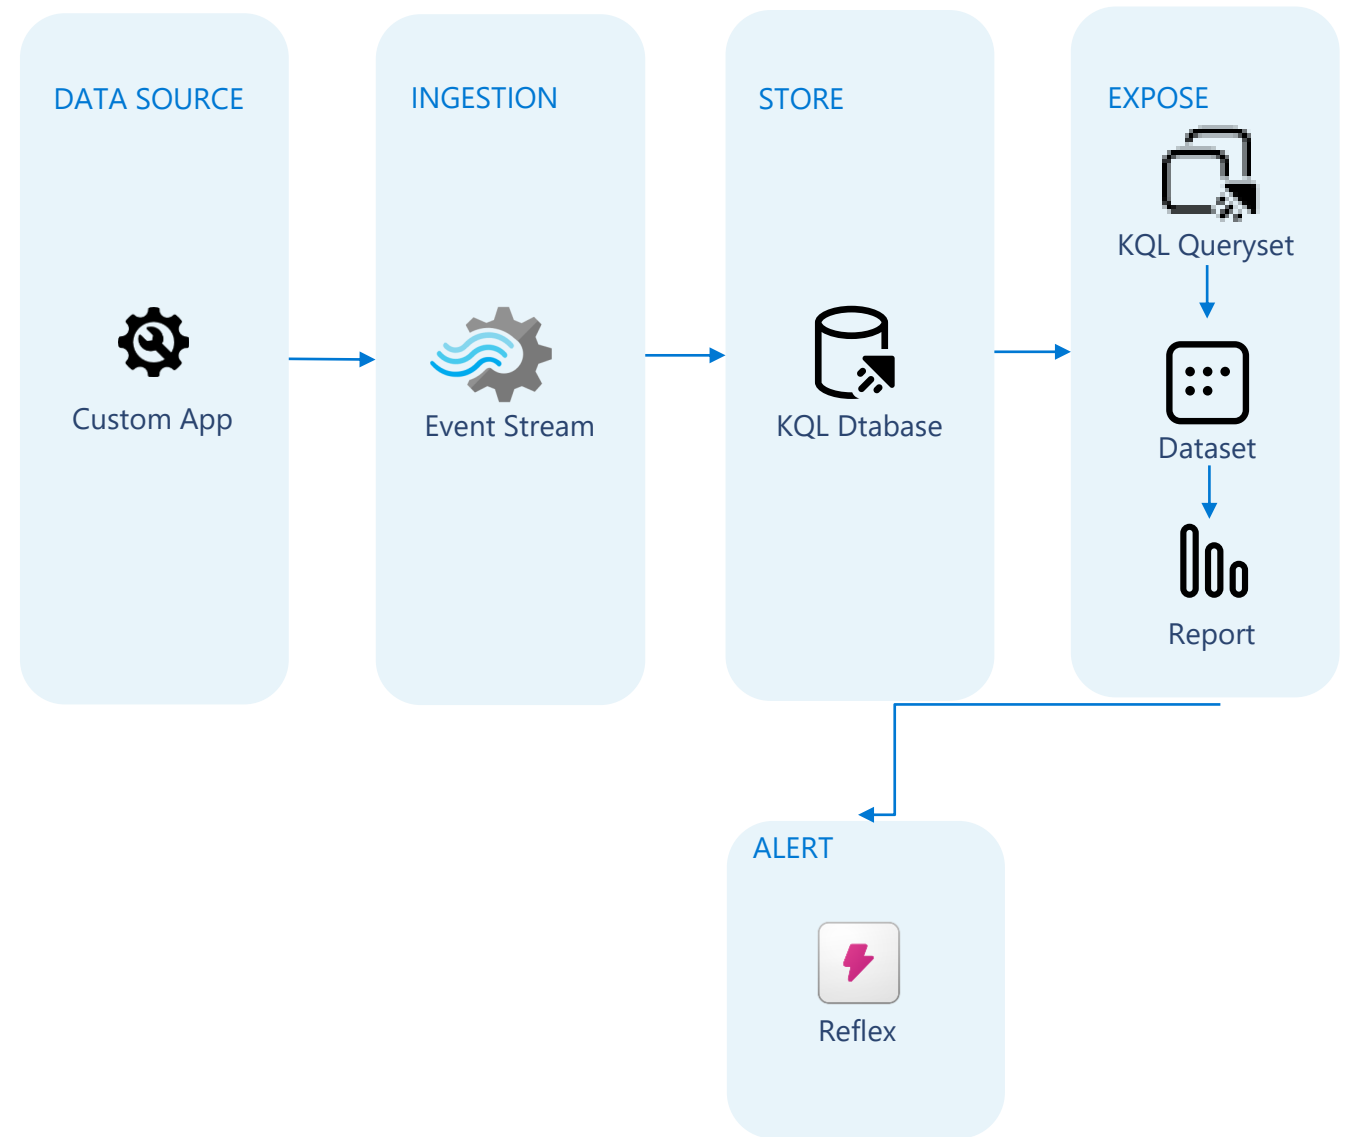

Demo Time
Flight Data

Demo - Flight Prices Data

Architecture

Wrap Up

- MS Fabric offers a complete and easy to setup solution for real-time analytics scenarios
- Use Onelake and direct lake to shortcut your process
- Alternatively, use Kusto's engine to build a more robust solutions for a more demanding workload
- Changing schema in onelake tables or datasets in direct lake not fully supported **yet**
- Power BI Dataset Quick Create from KQL database could use some improvements
